

## IS MASK WEARING DANGEROUS?

Generally, wearing a face mask without proper training, leads to increased exposure.

MEDICAL FACTS AND STUDIES  
 Showing ineffectiveness and danger

Wearing masks has become the “thing to do”

## DO FACE MASKS WORK AT ALL?

Standard medical masks are great for:

- Keeping spit out of a patient’s wound or incision
- Preventing bits of tissue and splatter from popping into a doctor’s mouth

*“One needs an electron microscope to see a COVID 19 virus particle. Average COVID 19 virus particle size... is **0.125 microns**... The hoarded N 95 mask only **filters down to 0.3 microns**. So, **N95 masks block few, if any, virus particles**. This is a simple fact, so you just cannot argue against it.” ~Doc Graham, MD*
